

Above Average Low-Income Population by Census Tract, 2000*

* Census 2000 (SF3, Table P87) data was used to calculate the percentage of low-income population within each census tract in the region. Tracts with a percentage of low-income population higher than the regional average are considered to have an above average concentration for this population.

-  Counties
-  Municipalities
-  Above Average Concentration of Low-Income Population
