Public Comments received by the February 14, 2024 deadline for the 2024-2025 UPWP

Public Comment #1:

I am advocating for safe walking and biking infrastructure by developing a comprehensive, interconnected, physically separated bicycle route network for the region, road diets with improved pedestrian and cyclist features, replacing intersections with roundabouts, reducing vehicle speeds with engineering controls. Distracted and dangerous drivers can ignore signs and rules, but not the laws of physics! Also universally effective snow removal on sidewalks and bike trails for the region, especially Rochester.

Reply #1:

Thank for you contacting the Genesee Transportation Council (GTC) regarding the 2024-2025 UPWP Public Review and providing feedback on what's important to you. Although your comments are not directly related to projects proposed for this draft work program, your sentiments will be shared with key staff members working on Active Transportation and Safety planning efforts.

Reconnect Rochester Comments:

Dear GTC Planning Committee,

Reconnect Rochester appreciates the opportunity to provide input on the 2024-2025 Unified Planning Work Program (UPWP) draft. Our organization envisions a more equitable, sustainable and multimodal transportation network for our region, and champions transportation choices that enable a more vibrant and equitable community. Our mission supports many of the goals outlined in the 2045 Long Range Transportation Plan, particularly those aimed at increasing the accessibility and mobility options for all people -- regardless of age, ability, income or mode of transportation.

We support funding projects in the UPWP that will improve safety and accessibility for all users of our roads. We particularly support the following new projects:

- Task 8754 - Town of Gates Active Transportation Plan
- Task 8756 - Monroe County Active Transportation Implementation Plan
- Task 8757 – City of Rochester Alleyway Reactivation and Conversion Program

In addition, the following are potential future studies we would recommend and support:

- **Impacts of Projects on Carbon Emissions:** Studying the costs and feasibility of projects that would yield the greatest reduction in carbon emissions and air pollution over a set period of time would help the region work towards its climate goals.
- **East/West Trail Counterpart to the Genesee River Trail:** The Genesee River Trail is one of the area's major all-weather active transportation "highways" and also provides access to many recreational opportunities. It only runs north/south. We urge a study of the benefits, feasibility and cost of a similar east/west multi-use trail, possibly adjacent to either the Conrail or 490 rights of way.

Public Comments received by the February 14, 2024 deadline for the 2024-2025 UPWP

- **Bus Rapid Transit:** Increased public transit use is vital to carbon reduction and the equity goals of the region. Public transit will continue to be less attractive to people who have a choice to drive, as long as travel times for transit are dramatically slower than automobile commute times. We recommend a feasibility study of BRT in the Rochester area.
- **Light Rail or Streetcar Feasibility Study:** Many medium-sized cities such as Rochester have constructed light rail or streetcar routes to add value to their metropolitan cores. A study of the benefits, feasibility and costs of such infrastructure could provide guidance to our city and region for long-term transit planning.

Thank you for the opportunity to provide input for your consideration.

Sincerely,

Bill Collins

Reconnect Rochester Reply:

Thank you for providing comments regarding the FY 2024-2025 Unified Planning Work Program (UPWP). GTC is pleased to hear support for several new projects including the Town of Gates Active Transportation Plan, Monroe County Active Transportation Implementation Plan, and the City of Rochester Alleyway Reactivation and Conversion Program.

Thank you for submitting new UPWP projects ideas. The UPWP Development Committee (UDC) selects projects from a pool of applications that have been submitted by GTC member agencies, GTC staff, and local municipalities. Other agencies may submit UPWP applications with a member agency or municipal sponsor. New UPWP applications must be submitted in the fall. If Reconnect Rochester is seriously interested in further pursuing UPWP project ideas, please consider meeting with GTC staff to discuss the UPWP project development and selection process as well as potential project sponsors.

Please feel free to reach out if you have any additional questions about the UPWP development process.

Board of the Genesee Transportation Council
50 West Main Street, Suite 8112
Rochester, NY 14614

Dear Members of the Board,

On behalf of UNiCON, a partnership of unions and management leaders representing the greater Rochester and Finger Lakes Region organized construction industry, I am writing to express our strong support for the Unified Planning Work Program (UPWP) for 2024 - 2025, with particular emphasis on the outlined tasks: 7579 - Mount Read Boulevard Corridor Study Update; 7213 - Rt. 96 over Rt.14 Strategic Divestment Analysis; and 7707 - Inner Loop North Mobility and Development Strategy. These initiatives are crucial steps in addressing transportation challenges and enhancing infrastructure within the Genesee region.

UNiCON serves building trades union members, construction industry stakeholders, including contractors and developers, design firms, and public and private sector employers, by promoting:

- Construction projects and initiatives;
- Construction job opportunities, better working conditions, and benefits;
- Workforce growth and development;
- Collaborative relationships between labor and management.

The Mount Read Boulevard Corridor Study Update (Task 7579) is of paramount importance as it aims to evaluate and enhance the transportation infrastructure along this vital corridor. Given its significance as a primary route for both commercial and residential traffic, it is imperative to ensure its efficiency, safety, and sustainability. This study will undoubtedly provide invaluable insights and recommendations for optimizing the Mount Read Boulevard corridor, benefiting businesses, residents, and commuters alike. Notably, the Eastman Business Park, a cornerstone of our regional economy, relies heavily on the accessibility and functionality of this corridor. Therefore, its improvement is pivotal to sustaining and enhancing economic growth in our region.

Task 7213, focusing on the Rt. 96 over Rt. 14 Strategic Divestment Analysis, is also commendable. It is essential to assess the viability and potential impacts of divesting this infrastructure to ensure optimal resource allocation and long-term planning. This analysis will facilitate informed decision-making regarding the management and maintenance of critical transportation assets, ultimately contributing to the region's economic resilience and sustainability.

Furthermore, Task 7707, the Inner Loop North Mobility and Development Strategy, represents a significant opportunity to revitalize and transform urban mobility and development in the area. By reimagining the Inner Loop North corridor, this initiative has the potential to enhance connectivity, promote multimodal transportation options, and catalyze economic development and revitalization efforts. It is a visionary undertaking that aligns with the goals of creating more livable, vibrant, and inclusive communities.

DEDICATED TO BUILDING A BETTER COMMUNITY

By investing in the Mount Read Boulevard Corridor Study Update, Rt. 96 over Rt. 14 Strategic Divestment Analysis, and Inner Loop North Mobility and Development Strategy, we can advance our shared goals of improving transportation infrastructure, promoting sustainable growth, and enhancing the overall quality of life for residents throughout the Genesee region.

Thank you for your attention to this matter, and we look forward to seeing the positive outcomes of these initiatives for our community.

Chapter 1

INTRODUCTION

Role and Responsibilities

The United States Department of Transportation requires every metropolitan area with a population over 50,000 to have a designated Metropolitan Planning Organization (MPO) to qualify for receipt of federal highway and transit funds. The Governor of New York State designated the Genesee Transportation Council (GTC) as the MPO responsible for transportation planning in the Genesee-Finger Lakes Region, which includes Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates counties.

Given the size of the region, it is divided into three Planning Focus Areas: the Regional Core, the Eastern Regional Area, and the Western Regional Area. The Regional Core includes all of Monroe County plus the adjacent developed areas of Livingston, Ontario, and Wayne counties. (See map on page 2.)

To maintain the certifiable transportation planning process required by the federal government as a precondition for receipt of federal transportation funding, GTC must at a minimum produce and manage three major products:

1. Long Range Transportation Plan (LRTP)

This product provides a long range (at least 20-year) perspective of existing and projected transportation system capabilities, needs, and associated objectives, as well as recommended policies and actions to meet these objectives. It provides the framework for guiding federally funded planning and investment decision making in the region. The LRTP must be updated at least every five years.

2. Unified Planning Work Program (UPWP)

This product programs federally funded transportation planning activities that further develop the policies and actions contained in the LRTP into concept-level projects and programs. The UPWP allocates funding for both specific planning projects and on-going programmatic activities. The UPWP must be updated at least every two years.

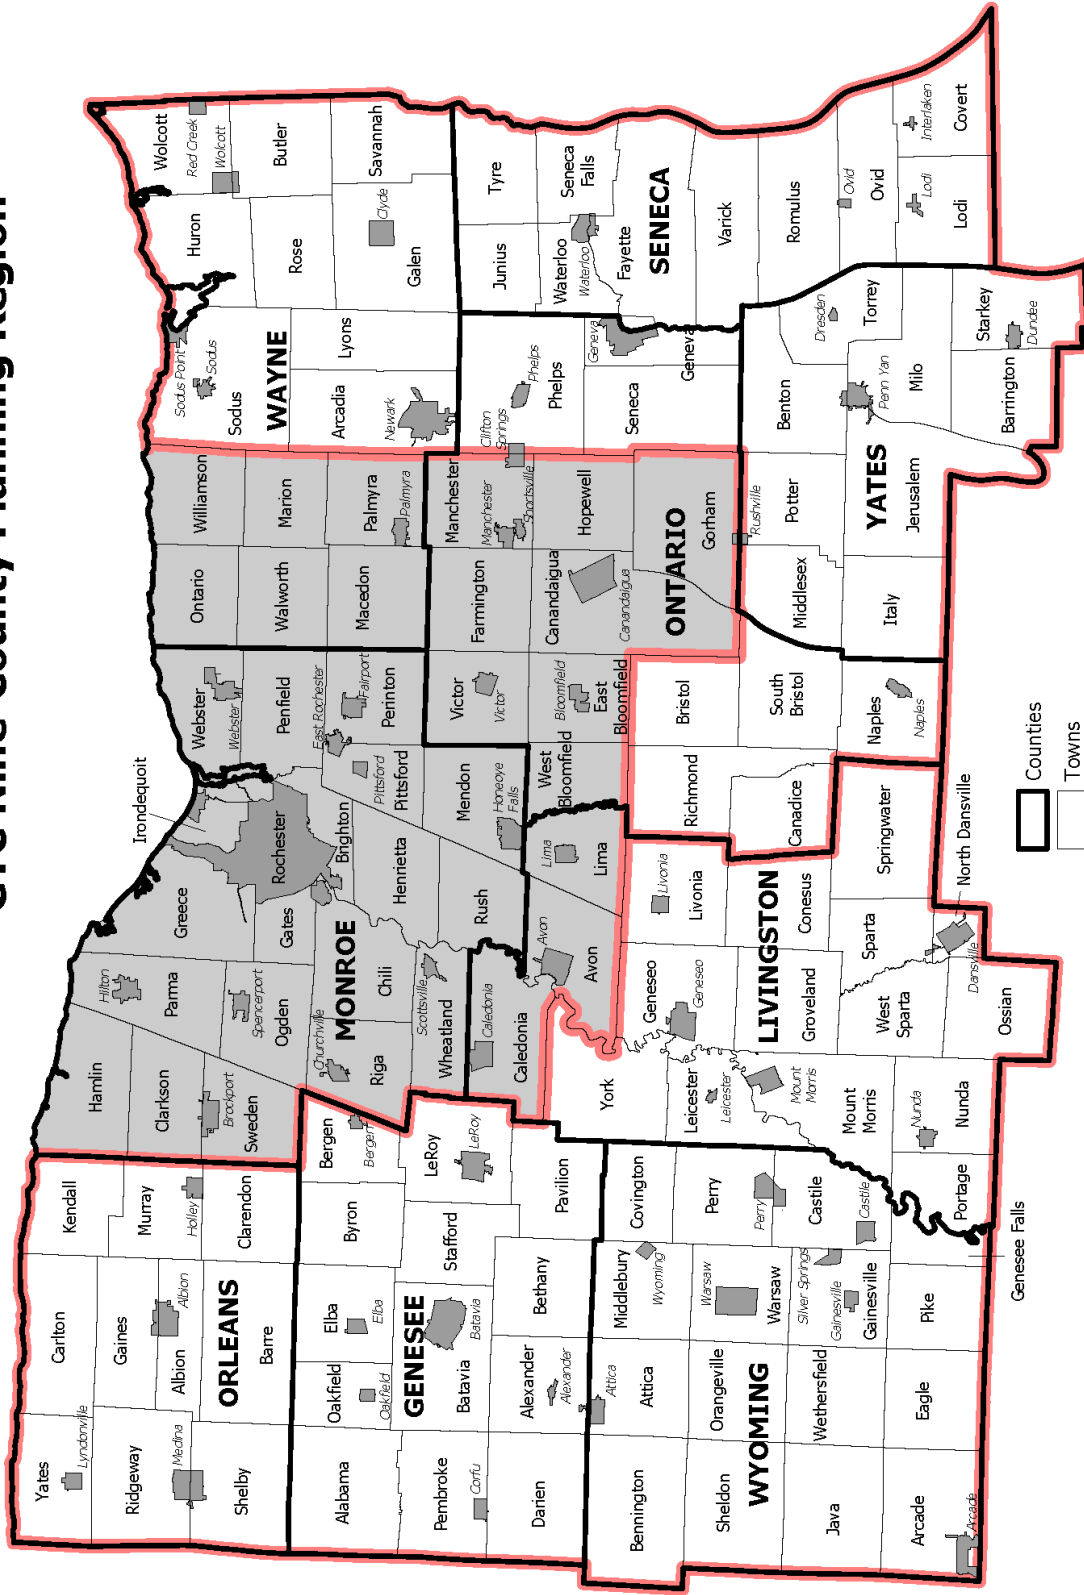

3. Transportation Improvement Program (TIP)

This product identifies and schedules the specific transportation improvements in the region that will receive federal funding over the next four-to-five years. Projects included in the TIP emerge from infrastructure needs identified by member agencies and are often informed by recommendations developed through UPWP-funded initiatives. The TIP must be updated at least every four years.

 Towns
 Cities and Villages
 Regional Core
 East & West Regional Areas

In addition to these requirements, GTC responds to other government mandates and guidelines such as the Americans with Disabilities Act, Title VI of the Civil Rights Act of 1964, and Environmental Justice considerations.

GTC Structure

GTC is governed by a 27-member policy committee, the GTC Board, which is supported by the Executive Committee, Planning Committee, and various other committees. GTC staff, in conjunction with key staff of GTC member agencies, provides professional and technical support for execution of the programs and policies established by the GTC Board, consistent with the responsibilities identified in the preceding section. Citizen participation is also incorporated at all meaningful levels of program development and decision making.

1. Board

The GTC Board is the governing body of GTC. It provides direction and establishes policy with regard to the roles and responsibilities of GTC as the designated MPO for the region. The GTC Board approves all activities and work products, including the LRTP, UPWP, and TIP.

The 27 members of the GTC Board consist of elected officials from the nine counties of the region and the City of Rochester, as well as representatives of other local, regional, state, and federal agencies. The GTC Board elects its own officers from among its members. (See page 4 for current membership and officers.)

The GTC Board meets quarterly, or as required. Each GTC Board meeting is open to the public and advertised as such through media outlets across the region. A public forum is included at the beginning of each meeting to allow for public comment on meeting agenda items before GTC Board action is taken.

2. Executive Committee

The Executive Committee is a subset of the GTC Board responsible for specific decision making related to administrative, organizational, and financial issues affecting GTC and its staff. It has eight members and meets as needed at the discretion of the GTC Board Chairperson. (See page 4 for current membership.)

3. Planning Committee

The Planning Committee provides professional and technical direction to the GTC Board. With input from the various committees noted on page 5, the Planning Committee reviews and recommends action on all activities and work products that are considered by the GTC Board.

Each member of the GTC Board appoints a representative to the Planning Committee. The Planning Committee representative is typically a transportation or planning professional. The Planning Committee meets eight times per year, or as required. Each Planning Committee meeting is open to the public and advertised as such through media outlets across the region.

Chapter 2

The Unified Planning Work Program

The Unified Planning Work Program or UPWP lists the federally funded transportation planning activities that GTC, its member agencies, and other municipalities in the Genesee-Finger Lakes Region will advance during a given fiscal year.

This UPWP covers the period beginning April 1, 2024 and ending March 31, 2025. It was developed through a cooperative process involving GTC member agencies, GTC staff, and various entities in the Genesee-Finger Lakes Region. Throughout the development process participants identified and prioritized proposed planning initiatives. Transportation planning projects included in the UPWP were selected based on the need, the relationship to other existing or proposed projects, potential implementation capacity, and funding constraints.

UPWP Development Process

While the majority of tasks in the UPWP are on-going or in progress from the previous UPWP, there are a number of new tasks. Each year, GTC solicits project partnerships from GTC member agencies and municipalities throughout the region. This allows GTC to respond to transportation planning needs that might not otherwise be funded given local budget constraints. In essence, local and federal transportation funds are leveraged to support transportation planning activities. Local planning studies that are funded through the UPWP development process must support and advance regional transportation priorities that have been identified in the Long Range Transportation Plan.

The Call for Project Partnerships (the Call) was issued on September 8, 2023. For fiscal year 2024-2025, GTC received applications for 18 projects. The development of the UPWP, and subsequent selection of new tasks through the Call, is guided by the UPWP Development Committee (UDC). The UDC consists of a representative from each county in the Regional Core, the City of Rochester, the Rochester Genesee Regional Transportation Authority, the Genesee/Finger Lakes Regional Planning Council, NYSDOT, and GTC staff. The UDC reviewed all the applications and deliberated to develop a balanced set of new projects, within the available funding, to recommend for GTC Planning Committee consideration.

An updated UPWP application was created for the fiscal year 2023-2024 Call for ProjectPartnerships project solicitation process. The new application incorporates the ten planning factors that MPOs must address through federal transportation planning legislation and more closely aligns with the recommendations presented in the *Long Range Transportation Plan for the Genesee-Finger Lakes Region 2045 (LRTP 2045)*.

GTC staff, working with the UDC, developed the Draft *FY 2024-2025 UPWP* for public review and Planning Committee consideration. The Planning Committee approved the release of the Draft for public review at its January 11, 2024 meeting.

A mass email campaign kicked off the UPWP public review process. The Draft was available for public review from January 15, 2024 to February 14, 2024 via <http://www.publicinput.com/GTCUPWP>, a dedicated webpage to review the draft. The public had the opportunity to provide comments in a variety of ways via the website. They could submit comments directly, send an email, text, leave a recorded voice message in any language, at any time or send traditional mail to the Genesee Transportation Council office. Additionally, GTC staff ensured that there were opportunities to provide the UPWP document in alternative formats upon request.

To reach the general public, GTC published a paid Legal Notice, issued a media release to about 75 news outlets in the 9-county region, and posted across social media accounts.

At its February 15, 2024 meeting, the Planning Committee recommended adoption of the *FY 2024-2025 UPWP* to the GTC Board. The GTC Board considered and adopted the *FY 2024-2025 UPWP* at its meeting on February 29, 2024.

The GTC Public Engagement Plan requires the Planning Committee to classify each individual UPWP task as Administrative, Technical/Data Collection, or Planning/Policy. UPWP tasks that are classified as Administrative or Technical/Data Collection do not require public input as part of project advancement. UPWP tasks that are classified as Planning/Policy require a specific public input component. At a minimum, the public input component includes the formation of a steering committee and public meetings that are advertised and conducted in the spirit of the New York State Open Meetings Law.

GTC strives to ensure that projects are completed in a cost-effective manner. The schedules included in this document are preliminary and subject to change. Another goal of GTC is to provide the public with the up-to-date status of all projects. Current project status reports are provided at Planning Committee meetings and posted on the GTC website.

During the COVID-19 pandemic GTC staff and project sponsors modified our collective approach to public engagement, focusing on virtual events and conducting outdoor meetings when the weather permitted. GTC and our project sponsors utilized the PublicInput.com platform in conjunction with online meeting services to conduct virtual outreach. It was observed, across all projects, that public engagement and input have increased using virtual engagement methods. GTC staff and project sponsors continue to utilize virtual engagement methods along with more traditional methods.

UPWP Transportation Planning Priorities

In addition to GTC staff working with member agencies through the UDC process to develop the individual tasks that will be advanced, the overall development of the UPWP is guided by federal transportation legislation and planning requirements, along with regional planning priorities identified through the MPO planning processes. The UDC also considers both federal and regional needs throughout the UPWP development process, as explained below.

Federal Transportation Legislation and Planning Requirements

The Infrastructure Investment and Jobs Act (IIJA), also known as the Bipartisan Infrastructure Law (BIL), is the current federal surface transportation authorization that was signed into law on November 15, 2021. GTC staff continue to monitor guidance resulting from the bill and are working towards incorporating provisions into the MPO's planning processes where applicable.

The IIJA/BIL carried forward the ten planning factors first identified in Fixing America's Surface Transportation (FAST) Act, the former five-year surface transportation reauthorization bill. The FAST Act identified and IIJA/BIL confirmed the ten planning factors that must be addressed through the projects and programs at the MPO.

Per 23 CFR 450.306(b):

"The metropolitan transportation planning process shall be continuous, cooperative, and comprehensive, and provide for consideration and implementation of projects, strategies, and services that will address the following factors:

- (1) Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency; (see Tasks 5205 and 5210)
- (2) Increase the safety of the transportation system for motorized and non-motorized users; (see Tasks 5531, 5904, 6230, and 6234)
- (3) Increase the security of the transportation system for motorized and non-motorized users; (see Task 5905)
- (4) Increase accessibility and mobility of people and freight; (see Tasks 6612, 7579, 8611, and 8622)
- (5) Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns; (see Tasks 4221, 5232, 5362, 6632, 7578, 7707, 7801)

GTC staff, working with the UDC, ensure to the greatest extent possible that the ten FAST Act Planning Factors are addressed through both existing and new UPWP tasks. Tasks that are particularly relevant to a planning factor are noted above.

In addition, the UPWP addresses FHWA and FTA Planning Emphasis Areas by advancing the implementation of IIJA/BIL requirements and promoting cooperation and coordination across MPO boundaries through staff participation in the NYSAMPO Working Groups.

Title VI / Environmental Justice Considerations

Environmental Justice is the name given to a series of laws and regulations which build on Title VI of the Civil Rights Act of 1964 and are intended to prevent discrimination by race, color, national origin, sex, age, disability, minority, or socioeconomic status in any programs, policies, and activities that receive federal funds.

As recipients of federal funds, MPOs such as GTC are required to identify and address the Environmental Justice implications of their planning processes and investment decisions. GTC considers Environmental Justice in all of its transportation planning activities, recognizing that such consideration improves policy, planning, and investment decision making processes and the results of these activities.

The Genesee Transportation Council is committed to:

1. Avoiding, minimizing, or mitigating disproportionately high and adverse human health and environmental effects – including social and economic effects – on all communities;
2. Ensuring the full and fair participation of all communities in the transportation decision making process; and
3. Preventing the denial of, reduction in, or significant delay in the receipt of benefits by all communities.

The Genesee Transportation Council's *Title VI Nondiscrimination Implementation Plan (2022)* is a set of policies and procedures which address how GTC integrates nondiscrimination practices into its planning, public participation, and decision making. The NYSDOT Office of Diversity and Opportunity found it to be in-compliance with all applicable Federal and State regulations mandated for a Civil Rights Program on August 1, 2022.

Federal Planning Emphasis Areas

The Planning Emphasis Areas (PEAs) are United States Department of Transportation (USDOT) priorities that MPOs, such as GTC, state departments of transportation, transit agencies, and federal land management agencies need to incorporate into their planning and work programs. The federal PEAs are as follows:

- Tackling the Climate Crisis – Transition to a Clean Energy, Resilient Future
- Equity and Justice40 in Transportation Planning
- Complete Streets
- Public Involvement
- Strategic Highway Network (STRAHNET)/U.S. Department of Defense Coordination
- Federal Land Management Agency (FLMA) Coordination
- Planning and Environmental Linkages
- Data in Transportation Planning

The federal PEAs as they relate to new tasks are listed as part of the **New Tasks and UPWP Priorities** section listed below.

UPWP Planning Priorities for the GTC MPO Region

The *Long Range Transportation Plan for the Genesee-Finger Lakes Region 2045 (LRTP 2045)*, adopted in June 2021, seeks to advance long standing regional transportation needs, such as improving safety, preserving existing assets, and expanding access to alternative modes, while emphasizing the growing need to make transportation services more equitable and accessible for all.

Overall, the regional transportation system routinely surpasses the needs of the region, with relatively quick and consistent commutes, ready access to employment centers and recreational opportunities, and reliable commercial delivery times. However, these needs are not always met equitably. The system favors those with access to personal vehicles. Opportunities to improve accessibility and mobility remain for those who depend on transit, walking, bicycling, and other active modes. As *LRTP 2045* strives to enhance the equity of the transportation system, increasing transportation choice and protecting vulnerable users is paramount to creating a more sustainable future and a more inclusive system. It is in this spirit that the *FY 2024-2025 UPWP* was also developed.

UPWP project proposals must be consistent with the priorities and policies of *LRTP 2045*. UPWP applicants are encouraged to propose projects that advance *LRTP 2045* priorities and policies. For the first time, the updated UPWP application specifically asks applicants to identify one or more *LRTP 2045* recommendations that will be advanced if their proposal is funded.

LRTP 2045 recommendations are organized into five broad topic areas and are directly linked to the ten planning factors listed as part of Section 450.306 of Title 23 of the Code of Federal Regulations, as follows:

1. Health and Safety

Planning Factor #2 – Increase Safety

Planning Factor #3 – Increase Security

2. Access and Equity

Planning Factor #4 – Increase Accessibility and Mobility

Planning Factor #6 – Enhance Integration and Connectivity

3. System Management and Maintenance

Planning Factor #7 – Promote System Efficiency

Planning Factor #8 – Emphasize Preservation

4. Sustainability and Resilience

Planning Factor #5 – Protect the Environment

Planning Factor #9 – Improve Resiliency and Reliability

5. Economic Development

Planning Factor #1 – Support Economic Vitality

Planning Factor #10 – Enhance Travel and Tourism

Individual recommendations are classified under one of the five topic areas listed above. Each topic area is denoted by an acronym. For example, the “Health and Safety” grouping is noted as “HS”. Therefore, the first recommended listed under the “Health and Safety” grouping, reads as “HS-1 Design for All Users”. *L RTP 2045* recommendations as they relate to new tasks are listed as part of the **New Tasks and UPWP Priorities** section listed below, per the recently updated UPWP application.

Goals and Objectives

The *L RTP 2045* identifies the following goals and associated objectives that reflect local and regional priorities within the context of the planning factors identified in the FAST Act:

1. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency

- The transportation system should support balanced community and economic development of the metropolitan area
- The transportation system should be a distinguishing competitive feature of the metropolitan area relative to other areas, serving the needs of existing businesses and enhancing the region's attractiveness to new business

2. Increase the safety of the transportation system for motorized and non-motorized users

- Transportation designs, services, and education programs should enhance and protect life, health, and property

3. Facilitate partnerships in planning, financing, and the execution of transportation initiatives

- The transportation planning and decision making process should be multi-jurisdictional, fostering coordination and cooperation among local, county, state, and federal governments, concerned agencies, and the private sector
- The transportation planning process should be conducted in as open and visible a manner as possible, encouraging community participation and interaction between and among citizens, professional staff, and elected officials
- Financial and non-financial support for transportation initiatives should be provided by all levels of government and the private sector in a fashion which reflects their relative responsibilities for, and/or benefits from, the initiatives and related economic and social impacts
- Innovative financing/partnerships for transportation initiatives that reflect the full scope of interests impacted or served should be explored

- Transportation and transportation-related information resources should be developed and shared in a fashion that promotes informed public and private sector decision making
- Awareness should be promoted regarding the impact of individual, public, and private sector decisions on the quality of mobility and the potential impact of these decisions on others

4. Increase the accessibility and mobility options available to people and freight

- The transportation system should provide the capacity, coverage and coordination necessary to provide mobility to the region's population and commercial activities in a fashion consistent with the overall intent of Goal 1
- Reasonable travel alternatives should be available to all persons in the area regardless of age, physical or mental ability, and/or income

5. Promote efficient system management and operations

- The transportation system should be designed and managed in a fashion that minimizes lifetime maintenance and user costs
- Transportation investments should advance the Long Range Transportation Plan's goals and objectives in a fashion which maximizes benefits relative to costs *
- Transportation and land use planning should be integrated in a fashion that optimizes the use of existing transportation and other municipal infrastructure
- Transportation investments should be guided by cooperative planning, design, and maintenance standards to promote system continuity and uniformity across jurisdictional boundaries

6. Protect and enhance the natural environment, cultural heritage and community appearance, and promote energy conservation

- Transportation planning and decision making should support and reinforce local land use and development objectives
- Transportation planning and decision making should recognize local priorities balanced with broader community goals
- Transportation planning and decision making should strive to address issues on a corridor level, recognizing both the multi-jurisdictional component of travel and the interrelationship between transportation and non-transportation policies and investments
- The transportation system should encourage the efficient use of non-renewable energy resources and the exploration of renewable alternatives
- Transportation planning and decision making should strive to embrace designs and processes that respect the natural environment and enhance the overall contribution of the transportation system to community livability

New Tasks and UPWP Priorities

UPWP Revenues

The UPWP programs federal transportation planning funds, as well as matching non-federal funds, for both specific projects and on-going programmatic activities. The two primary sources of federal transportation planning funds are Federal Highway Administration (FHWA) Section 104(d) Metropolitan Planning (FHWA-PL) funds and Federal Transit Administration (FTA) Section 5303 Metropolitan Planning Program (FTA-MPP) funds.

IIJA established a new requirement to dedicate a minimum of 2.5% of the FHWA-PL funds to Complete Streets Planning. These funds are segregated and managed through Task 5540. GTC modified the *2023-2024 Unified Planning Work Program* to reprogram the source of federal funds on Task 6533 – Joseph Avenue ArtWalk Master Plan from FHWA Metropolitan Planning (PL) funds to the Complete Streets Planning set-aside. As noted on page 96, Task 8754 – Town of Gates Active Transportation Plan will utilize these funds.

FHWA and FTA funds cannot exceed 80 percent of the total UPWP revenues. The remaining 20 percent must come from non-federal sources. The New York State Department of Transportation (NYSDOT) supports metropolitan planning throughout the state via toll credits and in-kind support that accounts for 15 percent of the total UPWP revenues. The remaining five percent of the total UPWP revenue are provided through cash and in-kind support from member agencies and other local and regional project sponsors.

Budget tables are provided for each task. Under the “Use of Funds” both staff time and contractual amounts are listed. Staff time is simply meant to pay GTC or member agency staff to assist with completing the given task. Contractual is money that is set aside to hire consultant services. Therefore, contractual funds are not spent down at the same rate as staff time. Funds that are shown as contractual are carried over from year to year until the contracted amount is spent down (i.e., consultant performs and bills for services completed) as the task progresses. Consequently, funds that are listed under contractual have been

committed to tasks and consultants via a legally binding contract (i.e., encumbered) and are not available to be applied to other tasks.

8757 – City of Rochester Alleyway Reactivation and Conversion Program

Objective: To develop a plan that will re-envision how alleyways function throughout the City of Rochester and develop a plan to reactivate these spaces to improve safety, provide connections for non-motorized/active transportation, and revitalize neighborhoods.

Classification: Planning/Policy

Participants: City of Rochester (Lead Agency) community organizations, and GTC staff

Budget:

Sources of Funds		Uses of Funds	
	FY 2024-25		FY 2024-25

Process: Form a steering committee. Issue RFP. Engage a consultant. Develop a community engagement plan. Inventory existing alleyways and document their current uses. Develop a typology of alleyways (e.g., types of uses served, which alleys may provide meaningful connections vs. basic property access, etc.). Conduct outreach. Identify recommendations to reactivate alleyways and reduce cut-through vehicle traffic while retaining necessary vehicular access for residents, businesses, and property owners. Develop up to 10 concepts to reactivate various typologies of alleyways in each quadrant of the City. Identify strategies necessary for implementation. Incorporate final concepts into a graphically-focused plan for implementation. Produce a final report.

They are included here for informational purposes about other planning activities that relate to those being conducted under the UPWP.

9100 – NYSDOT Statewide Studies*Pavement Condition Data Collection Services*

Collect pavement condition data as necessary to comply with annual state and federal requirements as well as NYSDOT pavement management practices. Develop and maintain a system to track location, dimension, and condition of other highway related assets.

Statewide Coordination of Metropolitan Planning Programs

The goal of this project is to support and maintain the ongoing coordination of the metropolitan planning programs in NYS for statewide benefit; the ongoing collaboration of the fourteen (14) metropolitan planning organizations (MPOs); and the on-going coordination of metropolitan and statewide planning programs.

Traffic Data System

Implement an automated traffic data management system application.

Probe Data: Floating Car (GPS-based)

The goal of this project is to purchase floating car probe data to establish performance targets to assess travel reliability, congestion, and emissions. Perform other analyses and visualizations of road performance for passenger cars and trucks. Data will be utilized by NYSDOT and the MPOs.

New York State Transportation Master Plan

The goal of this project is to produce an updated, statewide long-range transportation plan to coordinate federal and state transportation planning activities.

Nationwide Personal Transportation Survey (NPTS), Census Transportation Planning Program (CTPP), Intercity Travel (ATS) and Travel Patterns for NYS

The goal of this project is to establish a research and analysis capability with Oak Ridge National Labs (ORNL), Center for Transportation Analysis, to assist NYS in analyzing national data.

Research, Development & Support of an Integrated Planning & Performance Data & Analytics Framework (PPDAF)

The goal of this program is to leverage the current analysis tools to research and further integrate travel time datasets and available open-source analytics tools with other transportation, economic, and demographic data to support efficient and consistent planning and analysis.

Program & Project Management System Support Services

The goal of this program is to provide support services for post-implementation of a Department-wide enhanced and improved enterprise level program and project management system to facilitate improvements to capital program delivery.

Highway Oversize/Overweight Credentialing System (HOOCs) Phase 2

The goal of this program is to implement a Commercial Off-the-Shelf (COTS) HOOCs software solution and obtain accompanying integration services necessary to fulfill NYSDOT's Central Permitting Bureau business requirements. Phase 2 will advance functionality of HOOCs.

Statewide Small Culvert Inventory & Inspection System Improvements

The goal of this project is to expand the number of small culverts contained within the Department's AgileAssets Maintenance Management System (MMS) to create a complete statewide inventory and inspection of small culverts. The consultant will go into the field to locate small culverts and collect data related to physical attributes and inventory and inspection information.

Accelerating the Use of Integrated Incident Management System (IIMS) for Traffic Incident Data Collection and Management

The goal of this program is to demonstrate the ability of an enhanced IIMS to provide improved sharing of incident reporting between First/Secondary Response teams and operations centers to: improve situational awareness, enhance coordinated response to incidents and safety of incident scenes, reduce incident duration and impact (lane closures, delay, and occurrence of secondary incidents) using analytical tools that correlate IIMS w/vehicle sensor and other data sources.

CLEAR (Crash Location & Engineering Analysis Repository) Safety Management Data System Transfer

The goal of this project is to improve the transfer of crash data and images to support the CLEAR application. This project builds off of the work from another project with a focus on assessing the Department's safety analysis methods and safety programs and implementing new strategies using updated technologies and enterprise platforms.

Statewide Mobility Services Program

The goal of this project is to continue, and expand on, NYSDOT's agency-wide efforts to support and encourage the use of sustainable and efficient modal options for travel, while addressing the goals of the NYS Climate Leadership and Community Protection Act (CLCPA) to reduce GHGs 85% and achieve economy-wide carbon neutrality by 2050. It will build on the efforts of the existing Statewide Active Transportation Demand Management (ATDM) and will include additional technical assistance program elements, policy research, pilot initiatives and partnerships with employers, large institutions, destination, neighborhood and community organizations, local governments, and mobility providers. Work products are expected to result in products that specifically integrate mobility into existing NYSDOT policies, programs, projects, and protocols. This will include but is not limited to: regional and state-wide project development, prioritization, and programming; corridor plans; integrated multi-modal systems management and transportation management center (TMS) operations; and freight analysis.

The Eastern Transportation Coalition (TETC) / University of Maryland Data Acquisition

Acquire reliable and real-time travel time and speed data that has utility across multiple functional groups for the entire roadway network without the need for sensors or other hardware from six different categories: (1) Travel Time and Speed; (2) Origin-Destination; (3) Freight; (4) Waypoint; (5) Volume; (6) Conflation.

NYS Resiliency Improvement Program

Develop a NYS Resilience Improvement Plan (RIP) to help guide the immediate and long-range planning activities and investments of the State in respect to the resilience of the surface transportation system.

Employment / Establishment Data Acquisition

Access up-to-date employer and establishment data containing industry classification, employment and sales information that will contribute to modeling the use of a multimodal system by highlighting demand and supply areas, anticipate growth of need and increasing safety.

9400 – Regional Plans and Studies*Comprehensive Economic Development Strategy (CEDS)*

As the planning agency for the federally designated Economic Development District, G/FLRPC coordinates the development of the CEDS. The CEDS results from a local planning process designed to guide the economic growth of an area. This process helps create jobs, foster more stable and diversified economies, and improve living conditions. The CEDS process provides a mechanism for coordinating the efforts of individuals, organizations, local governments, and private industry with respect to economic development.

Finger Lakes Regional Economic Development Council Strategic Plan(s)

First formed in 2010, the Finger Lakes Regional Economic Development Council is charged with developing an economic strategic plan to capitalize on the existing and emerging industries that provide the greatest opportunities for economic growth. In 2015 the regional council published an updated strategic plan, *Upstate Revitalization Initiative Plan: United for Success*. In 2020, the regional council published the *2020 Finger Lakes Recovery Strategic* as a response to the COVID-19 pandemic. In 2022, the regional council issued the *2022 Finger Lakes REDC Annual Report*, updating the economic progress made since the pandemic took hold.

ROC the Riverway

The ROC the Riverway Initiative comprises over two dozen potential capital projects along the Genesee River. The projects include implementation of components of the GTC Regional Trails Initiative, Downtown Master Plan, and the Local Waterfront Revitalization Program. The advisory board is chaired by the Finger Lakes Regional Economic Development Council. In 2018, New York State announced an initial commitment of \$50 million to implement the first phase of the Initiative which consists of 13 projects. Since then, additional projects have been added to the overall program.

Climate Pollution Reduction Grant (CPRG) Program

The Genesee-Finger Lakes Regional Planning Council is the lead agency in the Rochester area for the development of a Priority Climate Action Plan (PCAP), which is Phase 1 and due by March 1, 2024. Phase 2 of the CPRG program is for implementation grants. On September 20, 2023, the EPA made \$4.6 billion available for implementation grants nationwide. G/FLRPC is currently conducting outreach to its member agencies and spreading the word regarding the availability of these grants. Applications for the implementation grants are due on April 1, 2024 and individual projects must be contained in the PCAP. Funding is available for a wide array of carbon reduction projects including transportation, electric power, building, and industrial sectors. G/FLRPC is focusing on grants for the transportation and building sectors.
